14 days is the best we can do, so we should have our data back by about September 16th.

Kathy,
Is there any way the samples could be expedited? We are doing a 48 hour turn around. The property owners are willing to pay for it but it is my understanding EPA is not charging for this work. I don't really know those details so I could easily be wrong.

Dot

Since we are paying the tab, I hope that this request can be accommodated. We need this event completed and summarized as quickly as possible. Thanks Vince

Dot:

I want to express our appreciation for the efforts being made by DTSC and EPA staff to expeditiously move the process forward for the reconfirmation sampling of the Ag Park property in Riverside. On that note, on Tuesday I spoke with the EPA representative regarding EPA's process and timeline for lab work for their split samples.

She said it would be "nominally 30 days" to get results out of their lab.

Is there anything you can do to "encourage" EPA to expedite the processing of their lab samples? It is my understanding you should have results from the soils samples starting mid to late next week; it would be nice to get the results from EPA lab in the same timeframe, so we could look to having a discussion on the soil sample results in a couple of weeks.

Specifically, we have authorized DTSC to pay for "expedited lab work" to reduce turnaround times for both PCBs and dioxin/furans. Since we are paying the bill, it makes sense to us to pay the incremental increase in cost for expedited results - it costs us more to wait for results.

We appreciate any assistance you can provide to move EPA along to complete their split sample results in a timely manner.

Please call me if you or staff have any questions regarding this request.

Thank you.
